WAYWAYA B. TACLIBON

Software Engineer | Software Developer
West Rembo, Taguig City | 09984952000 | waywayataclibon.wt@gmail.com | GitHub | Portfolio

SUMMARY

Software Engineer with experience developing and delivering web applications for enterprise and client-facing environments. Skilled in translating business requirements into practical software solutions, collaborating with cross-functional teams, and supporting applications throughout development, testing, and deployment. Adaptable and driven to continuously improve, with a strong foundation in full-stack development and a focus on building reliable, user-centered solutions.

TECHNICAL SKILLS

Frontend: HTML, CSS, JavaScript, ReactJS, TypeScript, jQuery, Tailwind CSS, Bootstrap, Vite
Backend: Python (Django), Node.js (Express.js), PHP

Database & Cloud: MySQL, MongoDB, Firebase, AWS (S3)
Tools: Git, Github, XAMPP, Figma, Jira, REST APIs
Methodologies: Agile (Scrum)

WORK EXPERIENCE

Komunidad Global Services & Operations Philippines Inc. **Taguig, NCR**
Junior Software Engineer Nov 2025 - August 2026

- Built and maintained a multi-module ESG Sustainability platform (Django, MySQL) covering ESG Monitoring, Reporting Manager, and Climate Tools, delivering customized modules and workflows for enterprise clients.
- Redesigned production database schemas via SQL migrations and Django ORM, building backend endpoints and automating scheduled workflows/notifications via Python cron scripts.
- Built dynamic dashboards with AWS S3-backed images and Chart.js visualizations, plus Excel import/export functionality using openpyxl.
- Implemented responsive UI/UX (HTML, CSS, Bootstrap, JavaScript) from product specs, and optimized backend stability using VS Code's Django debugger to resolve runtime errors and data mismatches
- Leveraged AI-assisted development tools (Claude Code, GitHub Copilot, & Gemini Antigravity) to accelerate boilerplate generation, syntax troubleshooting, and debugging cycles, while maintaining full code review and testing standards for production deployment. .
- Delivered 313 story points across 73 tickets in 10 months (one-week Agile sprints, Git/Jira), leading a high-value client account through 3 UAT sessions with real-time bug fixes and feature changes.

Torre Lorenzo Development Corp. **Makati, NCR**
Software Development Intern July 2024 - Jan 2025

- Supported development by conducting UAT for the company’s web-based Real Estate Management System (REMS), identifying UI and functional issues before deployment.
- Collaborated with developers to resolve system issues and ensure stability.
- Developed flowchart documentation of internal processes for executive reporting, ensuring clarity in project handovers and presentations.

PROJECTS

Makatipid: A Map-Based Rental Marketplace 2026
Solo Full-Stack Developer | Solo Project | Live Demo

- Built and deployed a full-stack rental marketplace (React, TypeScript, Node.js, MySQL) with map-based listings, filtered search, owner-renter messaging and a one-click demo mode.
- Integrated PayMongo QR Ph payments with server-side pricing and signature-verified webhooks, and prevented double bookings with 5-minute payment holds and row-locked, idempotent confirmation.
- Built an admin console for user suspension and booking and payment oversight, with an audit log of every admin action.

DopaWink: A Real-time Dating Web App 2025
Full-Stack Developer | White Cloak Launchpad Builder Round | Live Demo

- Built a real-time dating application using the MERN stack (MongoDB, Express, React, Node.js) featuring seamless user matching and live chat capabilities.
- Integrated Socket.io to establish a persistent connection for instant messaging and seamless, real-time user notifications.

ADUPay (Thesis Project): A Self-Service Payment Kiosk For Adamson University's Recognized Student Organization Jan 2025 - June 2025
Team Leader | Adamson University | Live Demo

- Led a 3-member team through Agile development of a web app for a client, designed for event financial monitoring.
- Built using React JS, Firebase Authentication, and Firestore, featuring a real-time role-based dashboard. Implemented UI features such as data filtering, CSV export, light/dark mode toggle, and secured access with Firestore rules.

Leyna's Variety Store Inventory Management System
Team Leader | Adamson University 2024

- Led development of a web-based POS and inventory system using PHP, MySQL, JavaScript, HTML/CSS for a remotely-managed sari-sari store.
- Integrated role-based access, real-time sales tracking, stock alerts, and barcode scanning for efficient operations.
- Successfully deployed after client-approved UAT, enabling seamless remote inventory and sales management.

EDUCATION

Adamson University **Manila, NCR**
Bachelor of Science in Computer Engineering Batch 2025

- Academic Merit Awardee, Top 3 Outstanding Student (GPA: 1.62)

LEADERSHIP & INVOLVEMENTS

Adamson Computer Engineering Society **Adamson University**
Treasurer 2023 - 2024

- Managed organizational finances and introduced a transparent tracking system.

Adamson Computer Engineering Society **Adamson University**
Outreach Director 2022 - 2023

- Directed outreach initiatives aligned with SDG goals and collaborated with university officials.
- Best Outreach Event Award (2023) for the "Together As One" campaign & Outstanding Treasurer Award (2024)

CERTIFICATIONS

- Oracle Cloud Infrastructure 2025 Certified AI Foundations Associate | *2025*
- Oracle Cloud Infrastructure 2025 Certified Foundations Associate | *2025*
